Bioelectrical Signal Processing in Cardiac and Neurological Applications

Leif Sörnmo, Pablo Laguna

Bioelectrical Signal Processing in Cardiac and Neurological Applications Leif Sörnmo, Pablo Laguna
The analysis of bioelectrical signals continues to receive wide attention in research as well as commercially because novel signal processing techniques have helped to uncover valuable information for improved diagnosis and therapy. This book takes a unique problem-driven approach to biomedical signal processing by considering a wide range of problems in cardiac and neurological applications—the two "heavyweight" areas of biomedical signal processing. The interdisciplinary nature of the topic is reflected in how the text interweaves physiological issues with related methodological considerations. *Bioelectrical Signal Processing* is suitable for a final year undergraduate or graduate course as well as for use as an authoritative reference for practicing engineers, physicians, and researchers.

Solutions Manual available online at <http://www.textbooks.elsevier.com>

- A problem-driven, interdisciplinary presentation of biomedical signal processing
- Focus on methods for processing of bioelectrical signals (ECG, EEG, evoked potentials, EMG)
- Covers both classical and recent signal processing techniques
- Emphasis on model-based statistical signal processing
- Comprehensive exercises and illustrations
- Extensive bibliography
- For companion web site with project descriptions and signals for download see www.biosignal.lth.se

From reader reviews:

Barbara Baker:

Why don't make it to be your habit? Right now, try to prepare your time to do the important take action, like looking for your favorite publication and reading a book. Beside you can solve your condition; you can add your knowledge by the publication entitled Bioelectrical Signal Processing in Cardiac and Neurological Applications. Try to face the book Bioelectrical Signal Processing in Cardiac and Neurological Applications as your good friend. It means that it can to get your friend when you feel alone and beside that of course make you smarter than ever. Yeah, it is very fortunated to suit your needs. The book makes you a lot more confidence because you can know anything by the book. So , let's make new experience as well as knowledge with this book.

Neil Calvert:

The book untitled Bioelectrical Signal Processing in Cardiac and Neurological Applications contain a lot of information on this. The writer explains the girl idea with easy technique. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read this. The book was compiled by famous author. The author gives you in the new period of literary works. You can read this book because you can read more your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can open their official web-site in addition to order it. Have a nice go through.

Douglas Stevens:

You may spend your free time to see this book this e-book. This Bioelectrical Signal Processing in Cardiac and Neurological Applications is simple to create you can read it in the playground, in the beach, train and also soon. If you did not possess much space to bring the particular printed book, you can buy often the e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when you buy this book.

Homer Simon:

What is your hobby? Have you heard that question when you got learners? We believe that that question was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And you know that little person just like reading or as reading through become their hobby. You must know that reading is very important and book as to be the issue. Book is important thing to increase you knowledge, except your own teacher or lecturer. You discover good news or update with regards to something by book. Numerous books that can you choose to use be your object. One of them is actually Bioelectrical Signal Processing in Cardiac and Neurological Applications.
