Coronary Heart Disease Epidemiology (Oxford Medical Publications)

Coronary Heart Disease Epidemiology (Oxford Medical Publications)

Heart attack (ischaemic heart disease or coronary heart disease) as one of a group of cardiovascular diseases, is one of the main causes of death (over 30 million/year) in the developed and developing world. The dual aim of this book is to review the well-established risk factors in CHD and to look forward to disease prevention, equipped with lessons from the past. The book covers etiology to public health, including studies within a single population and international studies, important areas of methodological development, trials to test preventive strategies, and the application of epidemiological and other knowledge to the development of public health policy for the prevention of widespread disease. It is an all-encompassing work containing contributions from the world authorities in the field.
