Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision)

Vincent Lepetit, Pascal Fua

Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision)

Vincent Lepetit, Pascal Fua

Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) Vincent Lepetit, Pascal Fua

Many applications require tracking complex 3D objects. These include visual serving of robotic arms on specific target objects, Augmented Reality systems that require real time registration of the object to be augmented, and head tracking systems that sophisticated interfaces can use. Computer Vision offers solutions that are cheap, practical and non-invasive. Monocular Model-Based 3D Tracking of Rigid Objects reviews the different techniques and approaches that have been developed by industry and research. First, important mathematical tools are introduced: Camera representation, robust estimation and uncertainty estimation. Then a comprehensive study of the numerous approaches developed by the Augmented Reality and Robotics communities is given. The authors begin with those that are based on 1D or planar fiducial marks and move on to those that avoid the need to engineer the environment by relying on natural features such as edges, texture or interest points are detailed. Extensions to more specific applications that require the use of a motion model or multiple objects tracking are also discussed. The survey concludes with the different possible choices that should be made when implementing a 3D tracking system and a discussion of the future of vision-based 3D tracking. Because it encompasses many computer vision techniques from low-level vision to 3D geometry and includes a comprehensive study of the massive literature on the subject, Monocular Model-Based 3D Tracking of Rigid Objects is an invaluable reference for the student and researcher.

From reader reviews:

Marie Aultman:

Here thing why this specific Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) are different and trustworthy to be yours. First of all looking at a book is good nevertheless it depends in the content from it which is the content is as yummy as food or not. Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) giving you information deeper and in different ways, you can find any e-book out there but there is no e-book that similar with Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision). It gives you thrill studying journey, its open up your eyes about the thing that happened in the world which is probably can be happened around you. You can bring everywhere like in playground, café, or even in your way home by train. If you are having difficulties in bringing the printed book maybe the form of Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) in e-book can be your alternative.

Eleanor Hayes:

The reserve untitled Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) is the guide that recommended to you to study. You can see the quality of the reserve content that will be shown to a person. The language that creator use to explained their ideas are easily to understand. The article writer was did a lot of study when write the book, therefore the information that they share for your requirements is absolutely accurate. You also could get the e-book of Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) from the publisher to make you considerably more enjoy free time.

Sarah Ford:

In this period of time globalization it is important to someone to obtain information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of references to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher which print many kinds of book. The particular book that recommended for your requirements is Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision) this book consist a lot of the information in the condition of this world now. That book was represented just how can the world has grown up. The vocabulary styles that writer require to explain it is easy to understand. Typically the writer made some research when he makes this book. Honestly, that is why this book suited all of you.

Keiko Whitchurch:

On this era which is the greater man or woman or who has ability to do something more are more valuable than other. Do you want to become considered one of it? It is just simple solution to have that. What you

must do is just spending your time not very much but quite enough to possess a look at some books. One of many books in the top record in your reading list will be Monocular-Based 3D Tracking of Rigid Objects (Foundations and Trends(r) in Computer Graphics and Vision). This book which is qualified as The Hungry Hills can get you closer in getting precious person. By looking right up and review this book you can get many advantages.
