At the Nukie Nuclear Power Plant, inside the nuclear reactor that sat beneath the big dome, (a.k.a. Reactor Containment Building) a whole lot of fissioning was going on. Where did it come from? Where did it go? A chubby lab rat and a pretty blue bird think they know. They speculate, exaggerate and blame everything they don't understand on their arch-enemy, a cat named Penelope. Who they suspect designed the nuclear power plant so she could use electricity to cook them for dinner. What they don't know is Penelope is a vegetarian. Created to get kids interested in what some perceive a boring topic. The book provides a creative, interesting, and informative introduction to how nuclear power plants work.
