## **Arguments for a New Left: Answering the Free-Market Right** Hilary Wainwright

As disillusion sets in with the free market right- the legacy of Thatcher, Reagan and Geoffrey Sachs-Hilary Wainwright retrieves and develops what was best in the thinking and practice of the new left.

Challenged by the appeal of neo-liberalism to young organizers in the civic movements of Central Europe, she tackles Hayek's critique of the all-knowing state, and his recognition of 'practical knowledge' that no state or party can second guess.

Drawing an alternative view of knowledge from the practice of social movements (from the 1968 student revolt, through militant shop stewards organizations and the women's movement, to green activism of the 1980's) as well as from new philosophical currents, Wainwright counters Hayek's individualism and denial of the legitimacy of the collective action, with a conception of knowledge as fundamentally social. On this foundation she establishes a new understanding of transformative political agency as well as self-consciously experimental and involving a combination of representative and participatory forms of democracy. Arguments for a new Left is sure to provoke wide discussion.
