Molecular and Cellular Biophysics (Pure and Applied Physics)

Jack A. Tuszynski

Molecular and Cellular Biophysics (Pure and Applied Physics) Jack A. Tuszynski

From quantum theory to statistical mechanics, the methodologies of physics are often used to explain some of life's most complex biological problems. Exploring this challenging yet fascinating area of study, **Molecular and Cellular Biophysics** covers both molecular and cellular structures as well as the biophysical processes that occur in these structures. Designed for advanced undergraduate and beginning graduate students in biophysics courses, this textbook features a quantitative approach that avoids being too abstract in its presentation.

Logically organized from small-scale (molecular) to large-scale (cellular) systems, the text first defines life, discussing the scientific controversies between mechanists and vitalists, the characteristics of living things, and the evolution of life. It then delves into molecular structures, including nucleic acids, DNA, RNA, interatomic interactions, and hydrogen bonds. After looking at these smaller systems, the author probes the larger cellular structures. He examines the cytoplasm, the cytoskeleton, chromosomes, mitochondria, motor proteins, and more. The book concludes with discussions on biophysical processes, including oxidative phosphorylation, diffusion, bioenergetics, conformational transitions in proteins, vesicle transport, subcellular structure formation, and cell division.

From reader reviews:

Scott Frew:

The book Molecular and Cellular Biophysics (Pure and Applied Physics) can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book Molecular and Cellular Biophysics (Pure and Applied Physics)? A few of you have a different opinion about book. But one aim which book can give many info for us. It is absolutely correct. Right now, try to closer along with your book. Knowledge or information that you take for that, it is possible to give for each other; you can share all of these. Book Molecular and Cellular Biophysics (Pure and Applied Physics) has simple shape but you know: it has great and large function for you. You can appearance the enormous world by start and read a e-book. So it is very wonderful.

Bertha Montes:

This Molecular and Cellular Biophysics (Pure and Applied Physics) are reliable for you who want to be a successful person, why. The reason why of this Molecular and Cellular Biophysics (Pure and Applied Physics) can be one of many great books you must have is giving you more than just simple reading food but feed anyone with information that possibly will shock your preceding knowledge. This book is definitely handy, you can bring it everywhere you go and whenever your conditions at e-book and printed kinds. Beside that this Molecular and Cellular Biophysics (Pure and Applied Physics) giving you an enormous of experience including rich vocabulary, giving you trial run of critical thinking that we understand it useful in your day activity. So , let's have it and revel in reading.

Jerry Deal:

The publication with title Molecular and Cellular Biophysics (Pure and Applied Physics) possesses a lot of information that you can study it. You can get a lot of gain after read this book. This specific book exist new knowledge the information that exist in this guide represented the condition of the world at this point. That is important to yo7u to learn how the improvement of the world. This book will bring you in new era of the glowbal growth. You can read the e-book in your smart phone, so you can read that anywhere you want.

Andrew Howe:

That publication can make you to feel relax. This specific book Molecular and Cellular Biophysics (Pure and Applied Physics) was colorful and of course has pictures around. As we know that book Molecular and Cellular Biophysics (Pure and Applied Physics) has many kinds or type. Start from kids until youngsters. For example Naruto or Private eye Conan you can read and think you are the character on there. So , not at all of book are make you bored, any it can make you feel happy, fun and loosen up. Try to choose the best book for you personally and try to like reading that will.
