Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy)

Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy)

Interdisciplinary research has been a popular idea with many people in the last 20 years. Academic administrators have admonished their faculty to become more interdisciplinary. Students often request the chance to pursue an interdisciplinary degree. While the issue of managing interdisciplinary projects has received a fair amount of attention by those interested in science management, interdisciplinary research has received little attention from historians, philosophers or sociologists of science or from scientists themselves. Yet, there is a number of cases within the life sciences where researchers have been actively engaged in endeavors that take them across disciplinary boundaries. These are ripe for investigation by those interested in the process of science. To provide an in-depth study of some historical or contemporary cases of cross disciplinary research activity in the life sciences, a conference was held at Georgia State University in May, 1984. This conference was supported by the National Endowment for the Humanities (U. S. A.) through their research conference program. Over a three-day period historians, philosophers, and researchers who were actively engaged in various of the life sciences discussed specific examples of interdisciplinary research and tried to analyze what was needed for successful crossing of disciplinary boundaries. After the conference, each of the participants revised their original presentations, partly in light of the discussion at the conference. The papers in this volume are the fruits of that endeavor.

From reader reviews:

Vicki Shah:

Information is provisions for people to get better life, information these days can get by anyone with everywhere. The information can be a know-how or any news even a concern. What people must be consider when those information which is within the former life are hard to be find than now's taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you obtain the unstable resource then you get it as your main information you will have huge disadvantage for you. All of those possibilities will not happen in you if you take Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy) as the daily resource information.

Emma O'Neill:

The particular book Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy) will bring someone to the new experience of reading a book. The author style to describe the idea is very unique. In case you try to find new book to study, this book very suited to you. The book Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy) is much recommended to you to read. You can also get the e-book from your official web site, so you can more readily to read the book.

Scott Bush:

The reserve with title Integrating Scientific Disciplines: Case Studies from the Life Sciences (Science and Philosophy) contains a lot of information that you can learn it. You can get a lot of benefit after read this book. This kind of book exist new information the information that exist in this e-book represented the condition of the world now. That is important to you to understand how the improvement of the world. This kind of book will bring you inside new era of the syndication. You can read the e-book on your smart phone, so you can read that anywhere you want.

Robert Garcia:
