Introduction from the Author

When answering the inevitable “Where are you going to school?” question, enunciation and endurance to the tenth and final syllable of Case Western Reserve University is key. “Case,” to most doctors and scientists, is enough to solicit an eager response. To many relatives and friends, however, Case is a foreign name and much explanation as to its location and importance is usually needed to smooth the wrinkles on confused foreheads.

I had heard of Case through word-of-mouth and in guidebooks for prospective undergraduate students interested in the sciences. Many of the guidebooks, however, neglected to mention some of the most critical details. No matter how many guides I had read (and that was many), I found that after a full calendar year here, the Case experience could not be accurately described by any of those books, though I hope that these pages do some justice.

Case is a continuously growing school and its flexibility and potential are steadily increasing. Case’s past endeavors have fueled its eminence and expansion; its accomplishments and growth carry it further still. Case’s role in scientific research and in producing talent in engineering, nursing, management, and the humanities are significant. The academic rigor and value of the education students receive at Case is of no contest—the experience and the value of a CWRU degree is widely respected in the professional realm. Case’s reputation, however, tells only the beginning.

The greater part of accomplished high school seniors are talented, involved and interested students, citizens and people who will demand a college experience that includes fields other than just their own academic departments. The flexibility of academics in the average students’ ability to add majors and participate in research is a valued piece of information to prospective students, as are the abundant opportunities available for students who strive to do more with their college experience than study. Administrators, faculty and campus leadership are also flexible. The organs of change and student initiatives are relatively small groups of highly motivated individuals. These individuals make up the concentrated enthusiasm that from time to time invokes change among a predominantly apathetic student body—a fact that should rouse the super-ambitious who realize the room for progress that can occur given the campus climate, flexibility and room for transformation.

The dynamics and minutiae of individual departments, campus climate, student body, faculty and their interactions can only be experienced—a consideration that must be kept at the forefront of every prospective student’s eager mind. If you have an interest in Case, you’re probably already aware of the multitude of academic and research opportunities, but are wondering about the little things. I hope that this guide will provide all the basic information but also fill in the gaping holes left by most other guidebooks.
