Casting Architecture: Ventilation Blocks

Florian Schätz

Casting Architecture: Ventilation Blocks Florian Schätz

The tropics have hot and humid climatic conditions that are inexorable against any building design. Enclosed spaces without air-conditioning and cross ventilation hold the heat, and become stuffy and moldy environments. Algae grow within days on plastered and painted surfaces due to the heavy tropical rains. The introduction of industrial mechanical building systems comes with high costs for both man and nature. Architects fight a continuous battle with climatic conditions and unsuitable material in an effort to offer more comfort and better design. Faced with climate conditions, the traditional art of building ceases to exist. Yet, architects like Kerry Hill and Kevin Mark Low create added value to a tropical design by combining both traditional methods of building while employing cross ventilation as a design feature. Traditionally, ventilation blocks have been used to make living in hot and humid regions more comfortable. Mass-produced modular blocks can take over construction loads, permit cross ventilation and protect the building's interior from intense tropical rainfall. Ventilation blocks, as modular-building systems, using carefully executed designs, create richly ornamented sculptural facades. Unfortunately, with air-conditioning and the current preference for steel-glass facades, ventilation blocks are no longer fashionable. Casting Architecture rediscovers the spirit of traditional forms of buildings. This publication shows the ventilation block as a unique tropical building element. Precast concrete pieces form not only walls, but also create, wonderfully fluent forms. By combining traditional principles with new, advanced building technologies, this studio generates excitement from old ideas and new products. The results are lightweight concrete screens with minimal materials, rich with tectonic reliefs, including fascinating forms and patterns. As homogeneous facades, they create a dramatic interplay of contrast with light. With each wall, the architect shows a unique construction expression. Casting architecture is a unique process of creating the vision of architecture in a concrete structure. Casting architecture inspires design enthusiasts toward erecting futuristic ideas in cement and concrete, and enables the further exploration and creative liberation of ideas beyond the limits of classical building methods. It also adds some excitement to those who want to learn more about how things stack together. An almost forgotten art, the Ventilation block has a long history as a traditional building module in tropical regions. It provides climatic comfort, protection and architectonic a continuous application of modules. This book rediscovers the formwork's beauty in a continuous application of modules, designed by Florian Schätz and the Year 02 architecture students from the department of Architecture at National University of Singapore.

From reader reviews:

William Perrotta:

What do you regarding book? It is not important with you? Or just adding material when you require something to explain what you problem? How about your free time? Or are you busy man? If you don't have spare time to accomplish others business, it is make one feel bored faster. And you have free time? What did you do? Every individual has many questions above. They need to answer that question simply because just their can do this. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on guardería until university need that Casting Architecture: Ventilation Blocks to read.

Dominic Maddock:

The publication untitled Casting Architecture: Ventilation Blocks is the guide that recommended to you to learn. You can see the quality of the book content that will be shown to an individual. The language that article author use to explained their ideas are easily to understand. The article writer was did a lot of investigation when write the book, so the information that they share for you is absolutely accurate. You also could get the e-book of Casting Architecture: Ventilation Blocks from the publisher to make you a lot more enjoy free time.

Christopher Decker:

Do you like reading a e-book? Confuse to looking for your favorite book? Or your book ended up being rare? Why so many question for the book? But any people feel that they enjoy for reading. Some people likes studying, not only science book but novel and Casting Architecture: Ventilation Blocks or maybe others sources were given knowledge for you. After you know how the great a book, you feel want to read more and more. Science guide was created for teacher or maybe students especially. Those ebooks are helping them to put their knowledge. In additional case, beside science reserve, any other book likes Casting Architecture: Ventilation Blocks to make your spare time more colorful. Many types of book like this.

Irma Lovern:

As a scholar exactly feel bored for you to reading. If their teacher requested them to go to the library as well as to make summary for some reserve, they are complained. Just small students that has reading's spirit or real their pastime. They just do what the trainer want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful photos on there. Yeah, it is to be complicated. Book is very important to suit your needs. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So , this Casting Architecture: Ventilation Blocks can make you sense more interested to read.
