DIY Solar Projects - Updated Edition: Small Projects to Whole-home Systems: Tap Into the Sun Eric Smith, Philip Schmidt

Learn how to make your own solar-powered appliances and additions to your home with this updated edition of *DIY Solar Projects*!

Put the sun to work in your home with the new, expanded edition of the popular 2011 title *DIY Solar Projects*. Like the original, this edition offers small-scale, achievable solar projects that homeowners can build and install themselves. From cooking in solar ovens to mounting solar panels on your roof, this book teaches how to take advantage of solar energy. It's all possible with relatively small investments and minimal DIY building experience.

You'll learn how to make:

- Tool trailer with available AC-power (directly from the sun)
- Solar systems for marine crafts
- Solar-powered security light
- Solar water heater
- Solar hot-air collector window mount
- Solar lumber kiln
- Solar battery charging station
- And more!

With clear instructions, tips, and step-by-step color photos for each project, this book takes the intimidation out of DIY solar builds. For those with more ambitious solar power plans, this updated edition contains information on outfitting your home with solar electricity collection systems and integrating them into your primary power supply system. Excitement about home solar energy is exploding, and *DIY Solar Projects: Updated Edition* sheds light on how you can get involved immediately.

This book also offers an extensive resource guide with links to tax-reducing, subsidy, and support programs on both a national and state-by-state level. With high energy costs and an environment that demands cleaner fuel sources, now is the time to introduce new, cost-saving solar projects into your home.

Amber Tyson:

As a college student exactly feel bored to be able to reading. If their teacher inquired them to go to the library or even make summary for some book, they are complained. Just minor students that has reading's soul or real their interest. They just do what the instructor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that looking at is not important, boring and also can't see colorful images on there. Yeah, it is for being complicated. Book is very important for you personally. As we know that on this period of time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore this DIY Solar Projects - Updated Edition: Small Projects to Whole-home Systems: Tap Into the Sun can make you feel more interested to read.
