Translating the evidence from the bedside to populations

This sixth edition of the best-selling *Epidemiology, Evidence-based Medicine and Public Health Lecture Notes* equips students and health professionals with the basic tools required to learn, practice and teach epidemiology and health prevention in a contemporary setting.

The first section, 'Epidemiology', introduces the fundamental principles and scientific basis behind work to improve the health of populations, including a new chapter on genetic epidemiology. Applying the current and best scientific evidence to treatment at both individual and population level is intrinsically linked to epidemiology and public health, and has been introduced in a brand new second section: 'Evidence-based Medicine' (EBM), with advice on how to incorporate EBM principles into your own practice. The third section, 'Public Health', introduces students to public health practice, including strategies and tools used to prevent disease, prolong life, reduce inequalities, and includes global health.

Thoroughly updated throughout, including new studies and cases from around the globe, key learning features include:

- Learning objectives and key points in every chapter
- Extended coverage of critical appraisal and data interpretation
- A brand new self-assessment section of SAQs and 'True/False' questions for each topic
- A glossary to quickly identify the meaning of key terms, all of which are highlighted for study and exam preparation
- Further reading suggestions on each topic

Whether approaching these topics for the first time, starting a special study module or placement, or looking for a quick-reference summary, this book offers medical students, junior doctors, and public health students an invaluable collection of theoretical and practical information.

From reader reviews:

Cheryl Phelps:

Do you have favorite book? For those who have, what is your favorite's book? Publication is very important thing for us to understand everything in the world. Each guide has different aim as well as goal; it means that guide has different type. Some people feel enjoy to spend their time to read a book. They may be reading whatever they acquire because their hobby is actually reading a book. What about the person who don't like reading a book? Sometime, individual feel need book once they found difficult problem or exercise. Well, probably you should have this Lecture Notes: Epidemiology, Evidence-based Medicine and Public Health.

Sandra Byrom:

Information is provisions for folks to get better life, information currently can get by anyone with everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is inside the former life are challenging be find than now could be taking seriously which one is suitable to believe or which one typically the resource are convinced. If you find the unstable resource then you buy it as your main information there will be huge disadvantage for you. All of those possibilities will not happen with you if you take Lecture Notes: Epidemiology, Evidence-based Medicine and Public Health as your daily resource information.

John Wilson:

The reason why? Because this Lecture Notes: Epidemiology, Evidence-based Medicine and Public Health is an unordinary book that the inside of the e-book waiting for you to snap the item but latter it will shock you with the secret this inside. Reading this book beside it was fantastic author who have write the book in such incredible way makes the content inside easier to understand, entertaining method but still convey the meaning fully. So , it is good for you for not hesitating having this anymore or you going to regret it. This excellent book will give you a lot of advantages than the other book get such as help improving your talent and your critical thinking approach. So , still want to hesitate having that book? If I were you I will go to the publication store hurriedly.

Jonathan Rodriguez:

Your reading 6th sense will not betray a person, why because this Lecture Notes: Epidemiology, Evidence-based Medicine and Public Health publication written by well-known writer whose to say well how to make book which can be understand by anyone who have read the book. Written in good manner for you, leaking every ideas and writing skill only for eliminate your personal hunger then you still doubt Lecture Notes: Epidemiology, Evidence-based Medicine and Public Health as good book not only by the cover but also with the content. This is one reserve that can break don't evaluate book by its include, so do you still needing an additional sixth sense to pick this!? Oh come on your reading sixth sense already told you so why you have to listening to yet another sixth sense.
