The Universe and its Life Alfred A. Maske

A proposed new Theory of Everything. Did the Universe originate with the Big Bang? Did the ancient civilizations have visitors from outer space? How vast is space? What is the inherent nature of the universe and its inhabitants? Is there an after life? These and other fascinating questions are explained in this exhaustive work that connects various spheres of knowledge from physics to religion to spirituality, in an effort to unify these supposedly different subjects and provide what scientists all over the world are working on: A Theory of Everything. Alfred A. Maske's scholarly work, written in lucid prose and devoid of scientific jargon, is as much a must-read for scientists as it is for the lay reader who wants a more comprehensive understanding of the self and the universe.
