## Corinth in Contrast: Studies in Inequality

In *Corinth in Contrast*, archaeologists, historians, art historians, classicists, and New Testament scholars examine the stratified nature of socio-economic, political, and religious interactions in the city from the Hellenistic period to Late Antiquity. The volume challenges standard social histories of Corinth by focusing on the unequal distribution of material, cultural, and spiritual resources. Specialists investigate specific aspects of cultural and material stratification such as commerce, slavery, religion, marriage and family, gender, and art, analyzing both the ruling elite of Corinth and the non-elite Corinthians who made up the majority of the population. This approach provides insight into the complex networks that characterized every ancient urban center and sets an agenda for future studies of Corinth and other cities ruled by Rome.
