From the Earth to Babylon: Gerald Bull and the Supergun is a historical graphic novel based on the life of Canadian Gerald Bull, considered to be one of the most brilliant scientists of the twentieth century and whose work affected the course of two modern wars. Bull's research led him across the globe, from Canada, to the Pentagon, to Barbados, to South Africa, and finally to Iraq. This volume tells of how this "boy genius" of rocket science experienced early success with the launch of HARP (the High-Altitude Research Project) with McGill University, to owning one of the world's largest and most sophisticated space programs with the Space Research Corporation.
