Evolution Revolution: Evolution is True. Darwin is Wrong. This Changes Everything. Alan Bennett
In the 1970s scientists discovered unexpected patterns that spanned the entire natural world. In seemingly unrelated areas - the birth of a galaxy, an ant colony, brain activity - the same underlying relationships reappeared. This pointed to a hidden layer of nature. In 1984, a group of scientists set out to penetrate this hidden world.

In one of science's most important discoveries, they found that everything in the universe was created using the same simple rules. Everything in nature emerged from this process - from atoms and molecules, to stars, planets, oceans, orchids, antelopes and the human brain. This led to the discovery of a revolutionary new theory of evolution which turns the old Darwinist ideas upside down.
