Marina Alberti

Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems Marina Alberti

As human activity and environmental change come to be increasingly recognized as intertwined phenomena on a rapidly urbanizing planet, the field of urban ecology has risen to offer useful ways of thinking about coupled human and natural systems.

On the forefront of this discipline is Marina Alberti, whose innovative work offers a conceptual framework for uncovering fundamental laws that govern the complexity and resilience of cities, which she sees as key to understanding and responding to planetary change and the evolution of Earth. Bridging the fields of urban planning and ecology, Alberti describes a science of cities that work on a planetary scale and that links unpredictable dynamics to the potential for innovation. It is a science that considers interactions - at all scales - between people and built environments and between cities and their larger environments.

Cities That Think like Planets advances strategies for planning a future that may look very different from the present, as rapid urbanization could tip the Earth toward abrupt and nonlinear change. Alberti's analyses of the various hybrid ecosystems, such as self-organization, heterogeneity, modularity, multiple equilibria, feedback, and transformation, may help humans participate in guiding the Earth away from inadvertent collapse and toward a new era of planetary co-evolution and resilience.

From reader reviews:

Leroy Torres:

With other case, little folks like to read book Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems. You can choose the best book if you want reading a book. As long as we know about how is important some sort of book Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems. You can add knowledge and of course you can around the world by just a book. Absolutely right, mainly because from book you can know everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you could know that. In this era, we are able to open a book or maybe searching by internet device. It is called e-book. You can utilize it when you feel weary to go to the library. Let's learn.

Anita Winn:

What do you concerning book? It is not important along? Or just adding material when you really need something to explain what yours problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? Everyone has many questions above. They must answer that question due to the fact just their can do this. It said that about guide. Book is familiar in each person. Yes, it is right. Because start from on guardería until university need this specific Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems to read.

Melvin Smith:

Reading a book to get new life style in this yr; every people loves to examine a book. When you learn a book you can get a lots of benefit. When you read textbooks, you can improve your knowledge, simply because book has a lot of information onto it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your research, you can read education books, but if you want to entertain yourself you can read a fiction books, these kinds of us novel, comics, and soon. The Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems provide you with a new experience in studying a book.

Scott Duran:

Many people spending their time frame by playing outside along with friends, fun activity along with family or just watching TV all day every day. You can have new activity to invest your whole day by reading a book. Ugh, do you think reading a book can definitely hard because you have to take the book everywhere? It all right you can have the e-book, getting everywhere you want in your Smartphone. Like Cities That Think like Planets: Complexity, Resilience, and Innovation in Hybrid Ecosystems which is finding the e-book version. So , try out this book? Let's find.
